

# WASHINGTON STREET NATURAL GAS PROJECT

## WORK IS STARTING SOON

You may remember earlier this year we provided details about our plans to replace 4 miles of natural gas line along Washington Street, between 76th Avenue and 105th Place/Washington Way.

**This work is now planned to begin as early as October starting near 76th Avenue and working south to north.** We still anticipate completing work in late 2023. Schedules are subject to change.

During our work, we'll have lane closures. We don't expect natural gas service interruptions during this work. If this changes, we'll reach out to you directly.

Our work in your community helps us to continue to provide safe, reliable service and to enhance system resiliency during extreme weather.

Public safety is at the foundation of all we do. If you ever suspect a natural gas leak, leave your location immediately. Once safely away, call 911, then Xcel Energy at 800-895-2999.

A photograph of a road construction site. In the foreground, several orange traffic cones with white reflective stripes are lined up on the asphalt. In the background, a silver car is driving away, and a large black sign with yellow lights is visible. The scene is partially obscured by a white diagonal graphic element on the right side.
